Hello,
for those that don't know my 'insert philosophy' - I am creating modular inserts that are focused on reducing setup and space on table, filament consumption is not my highest priority, but of course I'm trying to save some material where I can.
**Supports:**
**- sleeved card,** tested with Sloyca 70 microns thick,
**- vertical storage.**
**This insert features:**
- holder for polyomino tiles with ability to store them vertically during the game (similar to deluxe version of this game but more compact),
- holder for resources and statues + other stuff,

- separate holders for level 1, 2 and 3 cards.
Unfortunately I forgot about small square points tokens, but they can be stored inside one of the holders (for example with coins) or just in ziploc bag near cards.

**Requirements:**
**-** about 0.5kg of filament,
- at least 213mm x 180mm print bed,
- 8 6mmx3mm round magnets.

**Instructions:**
**-** print 2x Card_Holder_Level_2_3,
- print 1 of everything else, **no supports** required.

In future only thing that I will consider adding is small holder for these square points. Other than that this insert is complete. Enjoy!
